- SV-FBL200 | Papergraphics Satin polyester backlit film 195mic - 1372mm x 60m (1 Roll Box)
- SV-FBL200 | Papergraphics Satin polyester backlit film 195mic - 1524mm x 30m (1 Roll Box)

We like to describe this product as capable of offering excellent results even without backlighting. By day, you've got a visually-appealing substrate with a low-reflective finish for advertising and POS applications, while at night the film comes into its own with highly vivid colours that are sure to grab the attention of pedestrians.

Choose this product when you need a versatile film that delivers superb results even without backlighting. With no backlighting, it is a visually-appealing substrate with a low-reflective finish for advertising and POS applications. When backlit at night, the film comes into its own with highly vivid, attention-grabbing colours and definition. Ideal for lightbox displays in retail environments, airports, train stations, cinemas and exhibition halls.

Product Features

- 100% polyester film with a clear satin finish
- Brilliant light diffusion for vibrant illuminated prints
- Good dimensional stability
- Very fast drying times ideal for busy printing environments
- For indoor use; PVC free; REACH and RoHS compliant

Product Properties

Brand	Papergraphics
Colour	N/A
Media weight (gsm)	270
Media thickness (micron)	195
Media finish	Satin
Core diameter	76MM
Construction	Translucent polyester film
Opacity	0,28 - 0,30

Ink Technology Compatibility

Use with Aqueous Dye inks:	Not Recommended
Use with Aqueous Pigmented inks:	Not Recommended
Use with Oil Pigmented inks:	Not Recommended
Use with Laser toner:	Not Recommended
Use with Latex inks:	Recommended
Use with Solvent inks:	Recommended
Use with Eco-Solvent inks:	Recommended
Use with UV Curable inks:	Recommended
Use with Dye-Sublimation inks:	Not Recommended

Product Certifications

- REACH Compliant
- RoHS compliant

Usage Guidance

- This product has been designed for lightbox displays in both indoor and outdoor environments.
- In case of a multi-panel presentation, it is necessary to check before printing that in regard to the thickness of the film the printer can print with sufficient dimensional accuracy.
- Product is wound print side out
